Holding No. 108, East Nasirabad H/S, Chattogram,
Bangladesh

Objective

A passionate and adaptable JavaScript developer with hands-on experience in web development, specializing in NextJs, React, Angular and TypeScript. Proficient in handling complex SQL queries, integrating backend APIs, and maintaining large codebases. I am eager to contribute to building efficient, scalable solutions and deliver high-quality software, aligning with a dynamic team for long-term growth.

Skills

Frontend Development: React, Next, Angular, Angular Material UI, JQX Grid, Jasmine, karma, Redux Toolkit, Rtk Query, Bootstrap, Tailwind, HTML, CSS, SCSS, Ant Design, ShadCn, DaisyUI
Backend and Database: SQL, RESTful APIs, .NET Core, Oracle Database, NodeJs, ExpressJs, MongoDB, Mongoose
Version Control: Git
Code Quality: SOLID principles, clean code practices
Problem-Solving Tools: Debugging with Chrome Dev Tools, strong analytical skills

Experience

January, 2022-
Present

KDS Group of Industries

Oxygen more 255, Nasirabad I/A Chittagong-4211, Bangladesh

Jr. Software Developer

1. HR management System
 - Developed a loan system covering: application, editing, processing, post-processing, and reporting.
 - Integrated backend APIs for mobile bill handling and employee details management.
 - Managed Excel sheet uploads and implemented image upload handling
 - **Technology:** Angular, Angular Material UI, JQX Grid, TypeScript, Bootstrap, .Net Core, Oracle, SQL(Image)
2. EBS (Employee Benefit Scheme)
 - Automated tracking of salary contributions and generated reports in Excel/PDF.
 - Designed workflows for new applications and updates.
 - **Technology:** Angular, Reactive form, Ngx-extended-pdf-viewer, Angular Material UI, JQX Grid, Typescript, .Net Core, Oracle
3. QMS Adjustment (Quality Management System)
 - Implemented item tracking systems for production floors.
 - **Technology:** Angular, Reactive form, Angular Material UI, Typescript, Bootstrap

4. Material Issue Store

- Developed systems to handle material requisitions, stock checks, and batch-wise distribution.
- **Technology:** Angular, Reactive form, Angular Material UI, Typescript, Bootstrap, JQX Grid, SQL

Personal Projects	<div>WheelDeal (MERN)Live Frontend Backend<ul style="list-style-type: none">• Car Manufacturing Service with role-based access.</div> <div>Expense Tracker (MEAN Stack)Frontend Backend Live Site<ul style="list-style-type: none">• Implemented secure RESTful APIs and Firebase Authentication.• Used Signals for state management and followed TDD principles with Jasmine and Karma. Deployed the frontend on Firebase Hosting and backend on Vercel.</div>	
Certificate	<div>Udemy: Step-by-step guide for beginners on how to go through the creating your design project on Figma from start to finish</div> <div>Certificate Link: [Link to certificate]<ul style="list-style-type: none">• Acquired hands-on experience in Figma, wireframing, prototyping, and collaborating on design projects, about other design tools such as Whimsical</div>
